

EvoLucia™ LP3 Light Pack

- Canopies
- Breezeways
- Corridors
- Closets
- Cabinets
- Workbenches
- Residential garages
- Illuminated signs
- And more

EvoLucia LP3 Light Pack – Cost-Effective Lighting for So Many Needs

The **EvoLucia LP3 Light Pack** is the environmentally friendly, cost-effective, maintenance-free alternative to traditional lighting. The LP3 is an LED light that lasts 60 times longer than standard incandescent lighting, uses up to 75% less energy, and contains no mercury (unlike the potentially harmful CFL bulb). And the EvoLucia LP3 meets LEED requirements for light pollution reduction credits by minimizing light trespass, reducing sky-glow, improving nighttime visibility through glare reduction, and reducing impact on nocturnal environments.

Whether you're lighting porches or canopies, closets or attics, residential garages or apartment corridors, the EvoLucia LP3 Light Pack is the perfect solution.

For highly efficient, cost-effective, low-maintenance quality illumination, the EvoLucia LP3 Light Pack is your best choice.

LEDs, the enabling components of EvoLucia solid-state lighting products, are semiconductors that produce white light more efficiently than most traditional light sources. While the white light and high color rendition of LEDs has made them a good alternative to HID, CFL and incandescent lamps for certain applications, LEDs previously lacked the lumen output and optical control required for general illumination. Recent advances in LED efficiency – and EvoLucia’s proprietary technology – have changed that, making LEDs an increasingly obvious choice for environmentally friendly, cost-effective, low-maintenance lighting.

Features and Benefits:

- **Saves up to 75% of current energy costs**
- **Environmentally friendly**
- **Mercury-free**
- **LEED-compliant**
- **Maintenance-free for 11+ years**
